Broadcast graphics for netball livestreams, fed live from PlayHQ and run from one Mac.

VERSION 1 · OCTOBER 2026 · BY PIVT

ABOUT THIS GUIDE

Graphics that follow the game.

FirstPass Studio is a Mac app that draws broadcast graphics for a netball livestream and sends them to your vision switcher. The scores, clocks, ladders, fixtures and line-ups come from PlayHQ's public data, so there is nothing to type in during the game.

This guide starts with the way most nights run, one operator and Studio doing the rest, then covers running it by hand, setting up a competition, sponsors, athletes and the Stream Deck.

5 s
The live score, quarter and clock read from PlayHQ every 5 seconds while the game is scored.

31
Broadcast graphics, from the scoreboard and ladder to the sponsor wall, plus a test pattern.

17
Competition logo animations, and six intro and outro styles.

1
Operator on a followed night. Sequences run the run-up, the breaks and full time.

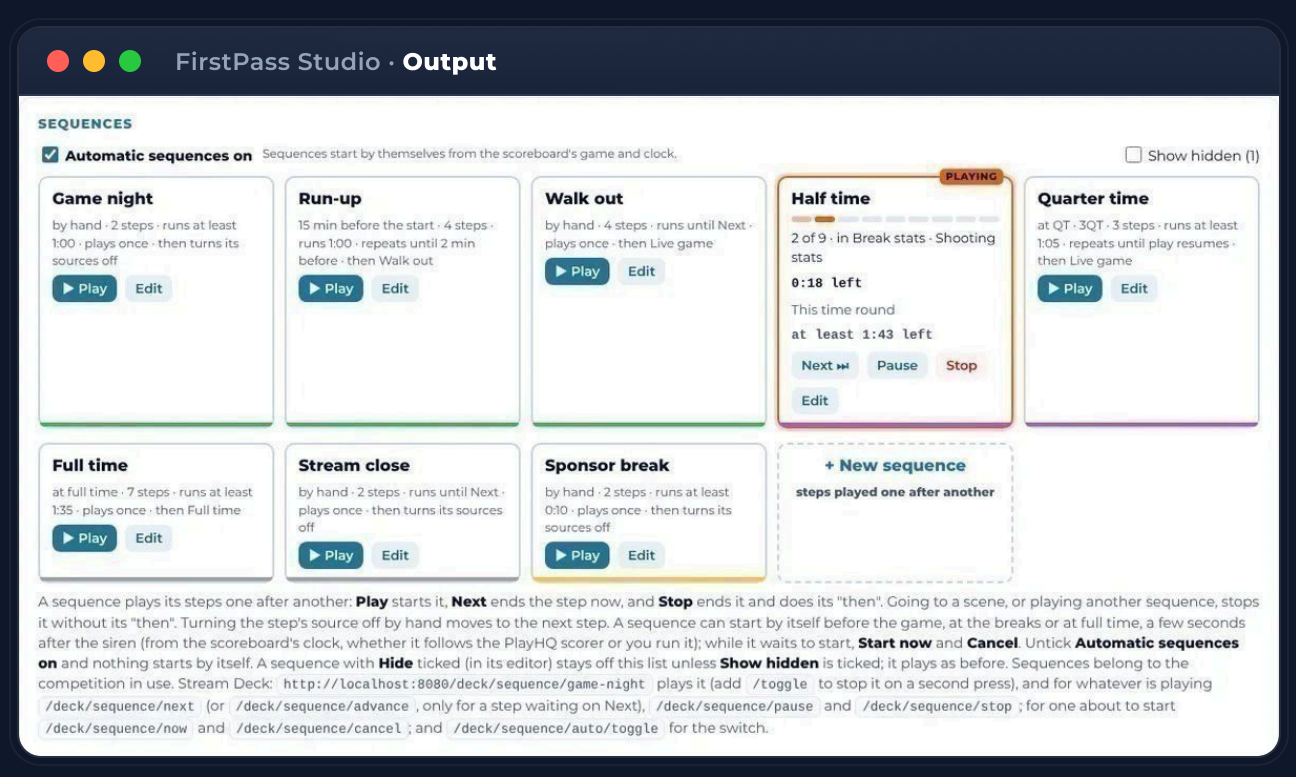

IN
PlayHQ
The fixture, ladder, line-ups and the live score from the scorer's tablet. No account, no key.

→

ON YOUR MAC
FirstPass Studio
Builds one 1920 × 1080 scene from layers: the base scene, automatic layers, scenes and sequences.

→

OUT
Your switcher
A display, a Blackmagic device or NDI, with fill and key or a chroma colour over the cameras.

The Output page runs the show; the super shot plays by itself.

INSIDE

01
What Studio is
The app, the words used and the pages you work in.

02
Getting started
Install, on air and off air, the 1P menu, the checklist.

03
Game night, the automated way
Follow PlayHQ, the base scene, automatic layers, sequences, music, output.

04
Running it by hand
Manual scoring and clock, and a two-person crew.

05
The graphics
Every graphic, pictured, with the options worth knowing.

06
Competitions setup
PlayHQ link, rules, finals, colours, logos, live viewers.

07
Sponsors
Tiers, spots, ads, sponsored moments and proof of play.

08
Athletes
Photos, silhouettes, positions and games played.

09
Stream Deck
The plugin's keys, the links and timed keys.

10
Settings and care
Data folder, iCloud, backups, updates and fixes.

11
Quick reference
Keyboard, the night in nine lines, where things are set.

The sample league
Every screenshot comes from Studio running the fictional Elite Netball League: eight clubs named after animals, three divisions, a live game and fictional sponsors.

CHAPTER 1 OF 11

What Studio is

01

FirstPass Studio is a Mac app that draws broadcast graphics for a netball livestream and sends them to your vision switcher. The scores, clocks, ladders, fixtures and line-ups come from PlayHQ's public data, so there is nothing to type in during the game.

1 The words used in this guide
2 The pages you work in
3 The sample competition in this guide

Studio does one job on stream night: graphics. Your cameras, switcher and streaming encoder stay as they are. Studio hands the switcher a picture with transparency (fill and key, or a chroma colour) so the graphics sit over the vision.

1.1 The words used in this guide

Studio
The whole thing: the Mac app, the pages you work in, and the graphics it puts on screen.

On air, off air
Studio is on air while a Studio window is open. On air it talks to PlayHQ, serves the graphics and answers the Stream Deck. Closing the last window takes it off air.

A graphic, or a page
One thing that can go on screen: the scoreboard, a ladder, a lower third, an animation. Each is a web page that Studio draws.

A source
A graphic placed in the scene, with its own position, options and fade. The scoreboard is one source; a ladder is another.

The scene
Studio's own 1920 × 1080 frame, built from sources switched on and off. It is what the switcher receives.

A scene (on the Scenes list)
A saved look: which sources are on and which are off. "Live game" and "Clear" are scenes.

A sequence
A list of steps played in order from one press: a run-up, a quarter-time break, a full-time wrap.

The competition
Everything that belongs to one league: its PlayHQ link, names, rules, colours, logos, sponsors and athletes. Studio keeps a setup per competition and uses one at a time.

The data folder
Where Studio saves everything, outside the app, so updates never touch it.

1.2 The pages you work in

Every Studio window has the same tab bar: **Output**, **Production Planner**, **Scoreboard control**, **Competitions setup**, **Sponsors**, **Athletes**, **Stream Deck**, **Socials** and **Docs** (⌘1 to ⌘9 in the app). Output is where the show is built and sent out; the Production Planner plans the court and the commentators for each night; Scoreboard control runs the board; Socials makes the night's pictures for social media; the rest are set up before the night.

> *Studio does one job on stream night: graphics.*

1.3 The sample competition in this guide

The screenshots use a fictional league, the **Elite Netball League**, with eight clubs named after animals (Falcons, Panthers, Stingrays, Cobras, Grizzlies, Hawks, Rhinos and Wolves) across Premier, Men's and Under 21 divisions, playing at the Metro Arena. Its sponsors are fictional too. Everything you see is what Studio draws for any competition once its setup is in.

CHAPTER 2 OF 11

Getting started

Install the app, import or make your competition, and learn the one rule that matters on stream night: keep a Studio window open.

1 Install · 2 On air and off air · 3 The 1P menu · 4 Before you go on air

2.1 Install

01
Download `FirstPass Studio.dmg`, drag the app to Applications and open it. It runs on Apple silicon Macs (M1 and later).

02
The **1P** icon appears in the menu bar, off air. Choose **Open Studio**. A short splash shows, Studio goes on air and the Output page opens in the app's own window.

03
Go to **Competitions setup** and either **Import a template file** (your league's `.json`, with its logos and sponsors inside) or **New competition** and fill it in (Chapter 6).

04
Back on **Output**, add the graphics you need with **Add page**, and turn on the video output that feeds your switcher (Chapter 3).

2.2 On air and off air

Studio only runs while a Studio window is open. Opening one (Open Studio, any page in the 1P menu, or ⌘N) puts it on air; closing the last one takes it off air, and the graphics and Stream Deck get no answer until a window opens again. Closing the last window while on air asks first, and so does ⌘Q, so a stray keypress can't stop a stream. Leave the Output page open all night.

The status line under the Output page's title shows the game on the board, whether scores and clock follow PlayHQ, how long since PlayHQ last answered (amber when overdue, red after a minute of errors) and whether the video output is on. If anything is wrong, this line says so on the page you keep open.

2.3 The 1P menu

Open Studio, Scoreboard control, Competition setup, Copy the Studio link, Devices..., Install the Stream Deck plugin, Back up... and Restore..., Settings folder (iCloud Drive), Open the settings folder, Open the debug log, Open the app log, Restart Studio, Open at login, Only this Mac can change things, What's new..., Check for updates, Stop Studio (while on air) and Quit. Updates download in the background and install when the app quits, never mid-stream; **Restart to update** installs one straight away.

LINKS Studio's links start with the Mac's Bonjour name, such as `http://matts-macbook-pro.local:8080/`, so the same link works from a phone, another computer or a Stream Deck on the same network. `http://localhost:8080` works on the Mac itself.

> **The one rule that matters on stream night: keep a Studio window open.**
>
> CHAPTER 2 · GETTING STARTED

2.4 Before you go on air

01
Open the app. The Output page opens and Studio goes on air. Keep a window open all night.

02
Right competition. Competitions setup shows the one in use at the top. Check its PlayHQ link, the court to follow and the scoring window.

03
Right game. On Scoreboard control, the picked game is tonight's first on your court and Follow PlayHQ is on.

04
Scores arrive. Once the scorer has started on PlayHQ, the control page says the game is being live scored and the board moves. Nothing is read before the scoring window opens, so a quiet board before then is normal.

05
Scene and output. On Output, turn on the display, NDI or Blackmagic output your switcher takes, check fill and key or chroma, and show one graphic to see it land.

06
Sound. Play a few seconds of music and an animation with sound, and check the sound only comes out where you want it.

07
Stream Deck. Press a Source key and watch the Sources list follow it. A score key switches scoring to Manual, so put it back to Follow PlayHQ after testing.

08
Sponsors. Tonight's spots and ads are on; the sponsor report starts counting when the output turns on.

CHAPTER 05

Game night, the automated way

This is how most nights on our operation. Playing scoring mix of music, a handful of video, and a scoreboard. Input is the DJ, the automation and everyone else handle the turn over, the breaks and the ambiance.

How it fits together

Once the setup has been set, and saved, most nights look like this:

- **Before Players Arrive** — Load the night's game, check the scene, quickly scroll down the Automated Walk to make sure it's all there, and you're ready. Sometimes you'll add a few extra video clips, or change the music playlist, but that's rare. Most nights, it's exactly as you left it.
- **Players Arrive** — Start the Automated Walk. Now you're in charge of the game. The scoreboard is the main screen, the scoring logic runs the video and music, and you're the DJ.
- **Automatic Turns** — Every time a player finishes their turn, the Automated Walk moves to the next player. Video clips change, music changes, and the scoreboard updates. You're not pressing buttons for this — it's just happening.
- **Impromptu Changes** — Sometimes you'll want to change something on the fly. Or run the walk out, scribble on it, and then go back to it. Or add a few extra video clips. Or change the music. It's all easy to do, and it's all saved.

Above: Automated Walk in action. Each row is a player's turn, and the system moves through them automatically. Click any row to jump to it.

> A sequence can start by itself from the game's clock, carry music, and hand over to another sequence.
>
> — Automated Walk documentation

Scoreboard control

Above: Scoreboard control. Each player's score is shown here, with buttons to add or subtract points.

AUDIO FOR SCORE

Each time a player finishes their turn, the system can play a short sound effect to signal the change. Choose from a library of sounds, or upload your own. Sounds can be set to play automatically when a player's turn ends, or you can trigger them manually from the scoreboard.

TURN TIMER

Add a **Pyride Plugin** to show a countdown timer for each player's turn. You can set the duration, and choose what happens when time runs out — a warning sound, a visual flash, or both. Timers can be paused, reset, or extended on the fly.

TURN ORDER

Add a **Pyride Plugin** to show the current player and who's next. Turn order can be set manually or randomised at the start of each game.

The Output page

The Output page is the main screen your audience sees on stage or on the TV. OBS Studio, the right-hand side, and look for a dropdown labelled **Output**.

Every scene has **Video** and **Audio** tabs. Video is for what's on screen, Audio is for what's heard.

Video tab

Here you can set the scene's **Width** and **Height** (1920 × 1080 is the default), and the **Frame rate** (30 FPS is standard). Leave **Color space** and **Color range** at their defaults unless you have a specific reason to change them.

Audio tab

Here you can set the scene's **Sample rate** (48 kHz is standard) and **Channels** (Stereo is standard). You can also add **Hotkeys** to mute or unmute the scene's audio.

Above: The Video and Audio tabs in Scene Properties.

The base scene

Every game has a base scene. It's the layout of the game, the scoreboard, the video output. It's the **Scene** that you'll see in the Automated Walk, and it's the one you'll switch to when you're ready to play.

Most of the time, you'll build this scene once and then leave it alone. Add your scoreboard, your video output, and anything else you want on screen. Then save it.

Sometimes you'll want to change it mid-game — maybe you want to show a leaderboard between rounds, or add a countdown timer for a specific turn. That's fine — make the change, and it's saved. The next time you load the game, your changes are still there.

Above: The base scene, with its Scenes and Sources panels.

Automatic layers

Some things should appear on every turn, no matter what. A player's name, their score, a timer — you don't want to add these by hand each time.

Instead, add a **Pyride Plugin** to the base scene. Plugins can read the game's state and update themselves automatically. The scoreboard plugin knows whose turn it is and what their score is. The timer plugin knows when a turn started and how long it's been running.

Set them up once, and they'll work for every player, every turn, every game.

Above: Automatic layers in action. Each of these appears when a specific event happens in the game.

Each plugin has a **Trigger** — the event that makes it appear — and a **Duration** — how long it stays on screen. Some plugins also have extra settings, like which player they're tracking or what text they show.

Scenes

Scenes are the building blocks of everything you're creating in your game. Each scene is a layout that you can switch to during play. Think of them as different screens your audience will see — the main game view, a leaderboard, a countdown, or a "be right back" screen.

Above: The Scenes panel, showing a list of scenes for a game.

Some scenes are set up for the whole game and some will be unique to a single round. Some scenes may be **changed** during the game, while others should **not be touched**. Some scenes are **automatic** and will be switched to by the system, while others are **manual** and will only be switched to when you choose.

Scene Settings — Click **Scene Settings** to open the settings for the selected scene. Here you can rename it, change its type, and set whether it's automatic or manual.

Sequences

Sequences are the heart of your game. They're what run when your turn starts and end when your turn ends. Every time it's time for a new turn, a sequence is activated, and the scene that runs at that time, or the next break in full time, or a sequence that's been set to run at a specific point in the game.

Above: The Sequences panel, showing a list of sequences for a game.

WHEN A SEQUENCE ENDS

- **Scene** — Switch to another scene, or back whatever it was before.
- **Layout** — Add a layout, or remove a layout, from the current scene.
- **Timer** — Start a timer, or stop a timer.
- **Another sequence** — Start another sequence, or stop a sequence that's already running.
- **Turn order** — Change the turn order, or skip the next player.
- **Plugin** — Trigger a plugin's action, or change a plugin's setting.

WHEN A SEQUENCE ENDS, NORMALLY, ONE WILL:

	What it does
Pause	The timer and scoreboard stop. The system waits for you to resume. Use this for breaks, intermissions, or anything that needs a human to restart.
Stop	The sequence ends. The system moves on to the next one in the queue, or to the next player's turn if there's nothing else queued.
Loop	The sequence restarts from the beginning. Use this for countdowns, or anything that should repeat until you say otherwise.
Hand over	The sequence ends and immediately starts the next one in the queue. Use this to chain sequences together without a gap.

WHEN A SEQUENCE ENDS, YOU CAN ALSO:

- **Add a delay** — Wait a few seconds before the next sequence starts. Useful for giving players a moment to react.
- **Play a sound** — Play a short audio clip when the sequence ends.
- **Show a message** — Display a brief on-screen message, like "Time's up!" or "Next player".

Any of these can be combined. For example, you might set a sequence to **Pause** after 60 seconds, play a buzzer sound, and show the message "Time's up!" — so the timer stops, the audience knows why, and you're ready to continue when you are.

A sequence can be set to run at a specific point in the game, or to run when another sequence ends. For example, you might have a sequence that runs at the start of every turn, and another that runs at the end of every turn. Or you might have a sequence that only runs when a player's score reaches a certain number.

Sequence Settings — Click **Sequence Settings** to open the settings for the selected sequence. Here you can rename it, change when it runs, and set what happens when it ends.

Music, playlists and mix

Above: The Music and Playlists panels.

Music is organised into **playlists**. Each playlist is a collection of tracks that you've chosen for a particular part of the game. You might have one playlist for the opening, another for the middle, and another for the end. Or you might have one playlist for each player's turn. It's entirely up to you.

Add tracks to a playlist by dragging them from the **Music** panel, or by clicking the **+** button next to a track. You can reorder tracks within a playlist by dragging them up or down.

Playlist Settings — Click **Playlist Settings** to open the settings for the selected playlist. Here you can rename it, change its type, and set whether it's automatic or manual.

Video output

Video clips can be played on the main screen, on the scoreboard, or both. Choose where they appear when you add them to a sequence.

Video Settings — Click **Video Settings** to open the settings for the selected video clip. Here you can change its duration, and choose whether it's muted or not.

Video Output — Click **Video Output** to open the settings for the video output. Here you can choose which screen it appears on, and whether it's full screen or not.

Video Input — Click **Video Input** to open the settings for the video input. Here you can choose which camera it uses, and whether it's mirrored or not.

Video Filter — Click **Video Filter** to open the settings for the video filter. Here you can choose which filter it uses, and whether it's applied to the whole screen or just to the video.

Video Transition — Click **Video Transition** to open the settings for the video transition. Here you can choose which transition it uses, and whether it's applied to the whole screen or just to the video.

Video Effect — Click **Video Effect** to open the settings for the video effect. Here you can choose which effect it uses, and whether it's applied to the whole screen or just to the video.

Video Filter Effect — Click **Video Filter Effect** to open the settings for the video filter effect. Here you can choose which filter effect it uses, and whether it's applied to the whole screen or just to the video.

Video Transition Effect — Click **Video Transition Effect** to open the settings for the video transition effect. Here you can choose which transition effect it uses, and whether it's applied to the whole screen or just to the video.

Video Effect Effect — Click **Video Effect Effect** to open the settings for the video effect effect. Here you can choose which effect effect it uses, and whether it's applied to the whole screen or just to the video.

Video Filter Effect Effect — Click **Video Filter Effect Effect** to open the settings for the video filter effect effect. Here you can choose which filter effect effect it uses, and whether it's applied to the whole screen or just to the video.

Video Transition Effect Effect — Click **Video Transition Effect Effect** to open the settings for the video transition effect effect. Here you can choose which transition effect effect it uses, and whether it's applied to the whole screen or just to the video.

Video Effect Effect Effect — Click **Video Effect Effect Effect** to open the settings for the video effect effect effect. Here you can choose which effect effect effect it uses, and whether it's applied to the whole screen or just to the video.

CHAPTER 4 OF 11

Running it by hand

When nobody is live-scoring the game on PlayHQ, or PlayHQ stops answering mid-game, every automatic part of Chapter 3 has a button. The board, the breaks and the celebrations can all be driven from Scoreboard control and a Stream Deck.

1 Two people, not one
2 Switching to manual
3 The score
4 The clock and the quarter
5 Breaks and celebrations by hand
6 Finals

Studio still needs the competition on PlayHQ for its fixture, ladder, squads and results; what changes in manual mode is who runs the score and the clock. The same competition can be followed one week and run by hand the next, and nothing on the Output page changes between the two.

4.1 Two people, not one

A followed game can be run by one person because the score, the clock and the breaks take care of themselves. A game run by hand is a different job: someone has to press a key for every goal within a second or two of it, start and stop the clock with the umpire's whistle, and still call the breaks and the graphics. We recommend two people share it:

Camera operator

- Frames and follows play on the cameras, and cuts between them on the switcher.
- Runs the game clock from the whistle, with **Start / Stop** and **Reset clock** keys beside the camera controls.
- Scores the goals as they go in, **+1** or **+2**, because they are already watching the ring.
- Nothing else: no graphics, no breaks, no music.

Production manager

- Keeps the Output page open and watches the stream itself, not the court.
- Corrects the score (**−1**, **−2**) and the quarter, and sets the clock when it drifts from the venue's.
- Plays the run-up, break and full time sequences from their keys, and the lower thirds, ladders and stats during play.
- Runs the music, the sponsor ads and the end of night, and picks the finals winners.

If one person must do it alone, keep the Stream Deck to the score and clock keys and let the sequences do the breaks, exactly as they do in automated mode: the game triggers follow the scoreboard's clock whoever runs it.

> ***If one person must do it alone, keep the Stream Deck to the score and clock keys and let the sequences do the breaks.***
>
> CHAPTER 4 · RUNNING IT BY HAND

4.2 Switching to manual

Press **Manual** on Scoreboard control, or just press any score key: either switches the board to manual scoring and stops following the PlayHQ clock as well. Press **Follow PlayHQ** to go back; the score catches up with PlayHQ on the next check and the clock follows the scorer's again.

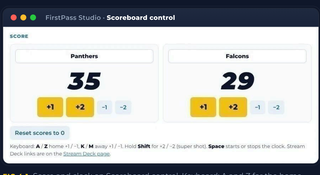

FIG 4.1 Score and clock on Scoreboard control. Keyboard: A and Z for the home team, K and M for away, Shift for a super shot, Space for the clock.

WHEN PLAYHQ DROPS OUT

If PlayHQ stops answering during a followed game, the scoreboard keeps its last score, the ladder, fixtures and game list keep what they last read, and the debug log records each failed read. Switch to Manual and run the board by hand; Follow PlayHQ picks it up again when PlayHQ is back, and corrects the score to the scorer's.

4.3 The score

Each team has **+1**, **+2**, **−1** and **−2**. A +2 is a super shot: it scores two and plays the super shot celebration, so a +2 pressed by mistake is fixed with −2 (which plays nothing). **Reset scores to 0** clears both. The hot streaks and game moments still play in manual mode, because Studio works out the goal order from the presses just as it does from PlayHQ's score.

KEY	WHAT IT DOES
Home +1 / Away +1	A goal.
Home +2 / Away +2	A super shot: two points and the celebration.
−1, −2	Take a goal or a super shot back, quietly.
Reset scores to 0	Both scores to zero, for the next game.
Super shot (home / away)	The celebration only, score unchanged: for a test, or a super shot that was scored as +1 +1.

4.4 The clock and the quarter

Start and **Stop** are one key on the Stream Deck. **Reset clock** puts a full quarter back (the competition's quarter length; a key can set any time). **+10 s** and **−10 s** nudge it, and a key can add or take off any amount. Type the venue's clock in **Match venue clock** to line the two up, and untick **Show clock** for a game with no reliable clock at all. Quarters are **Q1** to **Q4** plus extra time, or H1 and H2 for a competition played in halves; **Next quarter** steps through them. Changing the quarter doesn't touch the clock, so make the quarter key a Stream Deck Multi Action that also resets the clock.

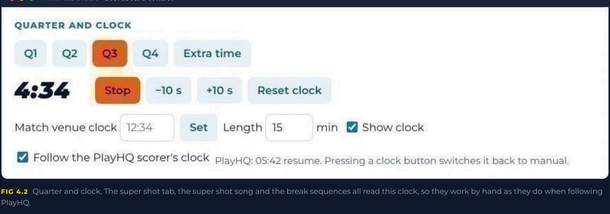

FIG 4.2 Quarter and clock. The super shot tab, the super shot song and the break sequences all read this clock, so they work by hand as they do when following PlayHQ.

4.5 Breaks and celebrations by hand

A sequence that starts by itself at quarter time is started by its key too, so the production manager can run **Quarter time** the moment the siren goes instead of waiting for the clock, or run **Half time** early when a game is called. **Next**, **Pause** and **Stop** work on whatever is playing, and **Automatic sequences on** on the Output page can be unticked for a night where every break is called by hand.

- **Winner.** One key. The celebration reads the board's score when it comes on, so it covers a home win, an away win and a draw. Check the score first. A source with **Result** set to home, away or draw forces it.
- **Super shot and streaks, once.** Besides the automatic sources, a Super shot source set to **Plays: home** or **away**, or a Hot streaks source set to one streak, plays once each time it is turned on. Don't keep a manual source and the automatic one on together, or it plays twice.
- **The Clash.** A pre-game animation, played from its key or as a step in the walk-out sequence, with the two teams, their logos and club colours.
- **Lower thirds.** The person lower third's name box on the Output page suggests the competition's athletes; type a guest's name and title for a commentator or an official. Turn it on when they appear and off a few seconds later.
- **Stats during play.** The ladder lower third, shooting stats, last 10 goals and match up are all Source keys. Each loads fresh when shown, so it has the latest numbers.

4.6 Finals

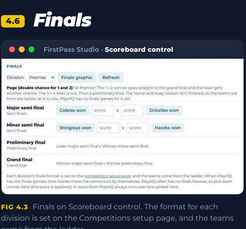

FIG 4.3 Finals on Scoreboard control. The format for each division is set on the Competitions setup page, and the teams come from the ladder.

PlayHQ often has no finals fixtures until the day. In **Finals** on Scoreboard control, pick the division, then pick each game's winner (the score is optional) as the finals are played; the finals graphic and the ladder's finals key move on with each pick. A result from PlayHQ, when it has one, always wins over one picked here.

CHAPTER 4 OF 11 · GRAPHICS

The graphics

Every graphic Studio draws, grouped by when it is used. Each one is added from the scene with **Add page** on the Output page, and its options named here are the ones worth knowing.

Jump to: Always on · Before the game · During play · After the game · The competition · The breaks · Checking the outputs

All of them follow the game night, game and court picked on Scoreboard control, take the competition's colours, font and logos from its setup, and bring them to broadcast with no extra work. Most are driven by Scoreboard and shrink to fit when they have more in them than fits. Every page, with its link and a Preview button, is also listed on the Docs tab.

5.1 Always on

5.1.1. Scoreboard. Always on the screen, both teams with their logos and club colours, the score, the quarter and the clock, ranked or unranked. Colours position (top-centre, bottom-left and so on), upper and tab on or off, and the naming rights sponsor's text.

5.1.2. Score bug. Where the scoreboard's team logos and club colours, the score, the quarter and the clock, ranked or unranked. Colours position (top-centre, bottom-left and so on), upper and tab on or off, and the naming rights sponsor's text.

5.1.3. Title. The competition, round and venue as a small always-on line, for broadcasts where none of the competition logo above it, top-of-screen, and the naming rights sponsor under it.

5.1.4. Viewers. A watching-now figure for the competition's live viewers, shown only when it is above a threshold you set, to avoid showing a small crowd. **Shows peak** makes it a card at the end of the night.

5.1.5. Scores. A scrolling ticker of the competition's results and upcoming fixtures, for the lower-third. **Speed** sets how fast it moves, **Items** how many are shown at once.

5.2 Before the game

5.2.1. Starting soon. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.2. Battle for premier. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.3. Head to head. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.4. Match up. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.5. Position match ups. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.6. Position match ups. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.2.7. Position match ups, all scores. The same page can show every position match-up at once.

5.2.8. Team list. Shown on the screen between games, with the two teams, their logos, the time and the venue, before the live events. Options: **heading**, the words at once, a title over the last episode, position and a sponsor.

5.3 During play

5.3.1. Super shot. Confirmed. Descending words reading a shooter's name and a made shot, for the scorer and through it. **Play's form /** away / be team makes a manual one.

5.3.2. On the siren. Shown in the last seconds of a quarter. Momentum and its momentum, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.3. Last 5 goals. Shown in the last seconds of a quarter. Momentum and its momentum, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.4. Lower third. Shown in the last seconds of a quarter. Momentum and its momentum, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.5. Shooting stats. Goals, super shots and attempts per shooter from the live feed, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.6. Person lower thirds, athletes. Name, team and club logo from the live competition, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.7. Person lower thirds, coaches. Name, team and club logo from the live competition, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.8. Commentators, the line. The commentary team in one shot with a name and role for each, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.3.9. Commentators, duo. The same names as an upper third in the line-up, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.4 After the game

5.4.1. Winner. Shown on the screen, logo, final score and a big word, worked out from the closed event time it comes on. Options: **text** a touch, the word, the line under the score, animate away.

5.4.2. Final score. Shown on the screen, logo, final score and a big word, worked out from the closed event time it comes on. Options: **text** a touch, the word, the line under the score, animate away.

5.4.3. Game stats. Shown on the screen, the totals for quarter, rebounds, assists, steals and blocks, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.4.4. Final time. Shown on the screen, the time of the game, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.4.5. Next up event. Shown after the last game, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.4.6. Score warm. The straight-through title game as a title, shown to lead a live segment. Options: **heading**, the club colours or the competition.

5.4.7. Picture board (full Pogo). The Pogo version, fully scored by line and court, for a scoreboard operator who wants the whole game on screen. Options: **heading**, **Tuesday night's fixtures**. The scrambled court size a scores and its games name the competition's name. **Shows peak** makes it a card at the end of the night.

5.4.8. Fixtures board (Pogo). Shown on the screen, the day's fixtures by time and court, for a scoreboard operator who wants the whole game on screen. Options: **heading**, **Tuesday night's fixtures**. The scrambled court size a scores and its games name the competition's name. **Shows peak** makes it a card at the end of the night.

5.4.9. Results. Shown on the screen, the day's results by time and court, for a scoreboard operator who wants the whole game on screen. Options: **heading**, **Tuesday night's fixtures**. The scrambled court size a scores and its games name the competition's name. **Shows peak** makes it a card at the end of the night.

5.4.10. Top shooters. Shown on the screen, the leading scorers for the competition, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.4.11. Finals. Shown on the screen, the finals results for the competition, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5 The competition

5.5.1. League. Shown on the screen, the table, with the form dots shown and every club's row, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5.2. Round fixture. Shown on the screen, the table, with the form dots shown and every club's row, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5.3. Player of the round (full page). Shown on the screen, the table, with the form dots shown and every club's row, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5.4. Results. Shown on the screen, the table, with the form dots shown and every club's row, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5.5. Competition logo, animated. Shown on the screen, the competition's own animated mark, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.5.6. Stingers. Shown on the screen, a sponsored transition, handle it for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

> *Cards sit in the space between the title and the scoreboard and shrink to fit when they have more in them than fits.*
> CHAPTER 4 · THE GRAPHICS

5.6 The breaks

5.6.1. Sponsor card. One sponsor's logo, tagline, offer and a QR code to their website, lasting a fix by for. Options: one set, two sponsors, rotate.

5.6.2. Sponsor loop. One sponsor's logo, tagline, offer and a QR code to their website, looping a fix by for. Options: one set, two sponsors, rotate.

5.6.3. Next up. Shown between breaks, the upcoming game's teams, time and court, for the scorer and through it from you. Play's side name the sponsor's through it to you for 'up'.

5.6.4. PIVT and FirstPass Studio ad. Broadcasts as a fix a break with nothing else to sponsor and show. Set it and forget it. Options: **Show ad** (always).

5.7 Checking the outputs

5.7.1. Test pattern. Colours, fine lines, ramps and a still. Broadcasts as a fix a break with nothing else to sponsor and show. Set it and forget it. Options: **Show ad** (always).

CHAPTER 6 OF 11

Competitions setup

Everything about a competition that doesn't come from PlayHQ lives on one page: its PlayHQ link, the names on the graphics, the game rules, finals, game day, colours, font and logos. Set it up once a season and every graphic follows.

PlayHQ · Names on the graphics · Game rules · Finals · Game day · Colours and font · Logos · Live viewers · Templates, export and more

Studio keeps a setup per competition. The one marked **In use** is what every graphic, Scoreboard control, the Sponsors page and the Stream Deck use. Changes aren't kept until you press **Save** (or **Save and use this competition**), and leaving the page with unsaved changes asks first.

FIG 6.1 The competitions list. Start from a template file (the repository has Thunder League, AMHNA Nationals, GIO WANL and West Coast Thunder) or press New competition for Studio's defaults.

6.1 PlayHQ

Paste the address of the organisation's page on playhq.com and press **Find its competitions**; then pick the competition and the season. For a carnival or a league run under another body, use the organisation the competition is listed under. Nothing else about PlayHQ is needed: no account, no key.

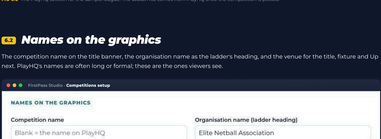

FIG 6.2 The PlayHQ section for the sample league. The season list comes from PlayHQ once the competition is picked.

6.2 Names on the graphics

The competition name on the title banner, the organisation name as the ladder's heading, and the venue for the title, fixture and Up next. PlayHQ's names are often long or formal; these are the ones viewers see.

FIG 6.3 Names on the graphics.

6.3 Game rules

Quarters or halves and their length set the clock, the quarter buttons and the wording of the break cards. **Super shots** turns on the +2 scoring, the celebration, the super shot tab in the last minutes of each quarter and the Super columns on the shooting graphics; a division can have its own setting, by its name or by a word in it ("Open", "Men"). The break lengths let the sequence editor say how many loops of a break sequence fit in the break.

FIG 6.4 Game rules. The sample league plays 15-minute quarters with super shots in the last 5 minutes, except in its Under 21 division.

6.4 Finals

Pick the finals format for the competition, or per division: it decides the finals places the ladder marks (double chance or a week off, elimination, playing for third) and the bracket the finals graphic draws week by week. PlayHQ's finals games are used when it has them; otherwise the winners are picked on Scoreboard control.

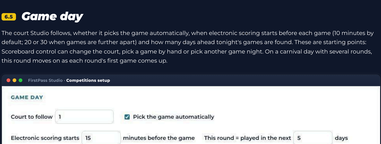

FIG 6.5 Finals formats, per division where they differ.

6.5 Game day

The court Studio follows, whether it picks the game automatically, when electronic scoring starts before each game (10 minutes by default; 20 or 30 when games are further apart) and how many days ahead tonight's games are found. These are starting points: Scoreboard control can change the court, pick a game by hand or pick another game night. On a carnival day with several rounds, this round moves on as each round's first game comes up.

FIG 6.6 Game day.

6.6 Colours and font

FIG 6.7 Colours and font, with the preview.

The competition's colours, see-through dark panels, and the font. Paste a brand kit's text into **Brand kit colours** and every HEX or RGB value in it becomes a swatch in each colour picker. Add a font file (TTF, OTF, WOFF or WOFF2, one per weight or a variable font) and it travels with the competition and its template, so the graphics look the same on any Mac; every font is sized to match the capitals of Montserrat, which the graphics were drawn with. The preview under the pickers shows a rough title and scoreboard in the colours before you save.

6.7 Logos

The **competition logo** has a light mode and a dark mode version (one is used for both if that's all you add); it shows beside the title in the branding logos, above the title with its option on, in the corner of the ladder and in the logo animations. **Team logos** are matched to PlayHQ team names by file name, so drop in a folder of files named after the teams. Logos and colours belong to clubs: every team of a club, in every division, gets the club's logo and colour, worked out from the team name without its division ("Falcons 2Yo" is Falcons). Fix a wrong match in the **Club** box. A club colour goes behind its teams' names on the scoreboard and behind their logo on The Clash; without one the competition's colours are used.

FIG 6.8 Competition logo, light and dark mode.

FIG 6.9 Team logos and the teams on PlayHQ, grouped by club with a club colour each.

> **Logos and colours belong to clubs: every team of a club, in every division, gets the club's logo and colour.**
>
> CHAPTER 6 · COMPETITIONS SETUP

6.8 Live viewers

Add the YouTube channels and Facebook Pages the competition streams to. While a video output is on, Studio adds up how many are watching every 30 seconds, for the Output page, the viewers graphic (which shows only from the minimum set here) and the viewer-minutes in the sponsor report. The page explains how to get a YouTube API key and a Facebook Page token; both are kept on this Mac only, never in iCloud, templates or exports.

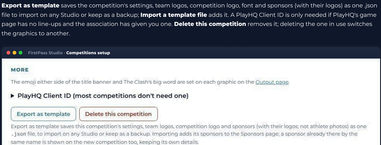

FIG 6.10 Live viewers.

6.9 Templates, export and more

Export as template saves the competition's settings, team logos, competition logo, font and sponsors (with their logos) as one .json file to import on any Studio or keep as a backup; **import a template file** adds it. A PlayHQ Client ID is only needed if PlayHQ's game page has no line-ups and the association has given you one. **Delete this competition** removes it; deleting the one in use switches the graphics to another.

FIG 6.11 The More section: Client ID, export and delete.

CHAPTER 7 OF 11

Sponsors

The Sponsors tab turns sponsorship into something you can sell, run and prove: a tiered library of sponsors, spots on the graphics that fill themselves, ad breaks that take turns fairly, and a report of what each sponsor got.

1 Tiers · 2 A sponsor · 3 Spots and moments · 4 Proof of play

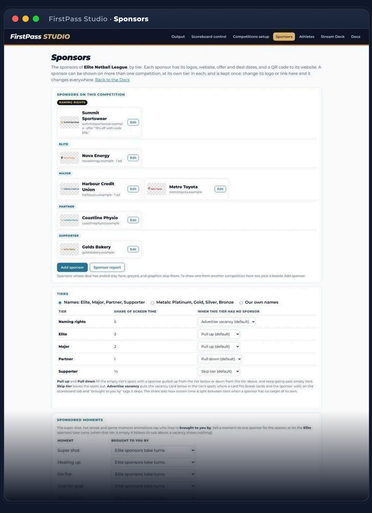

FIG 7.1

The Sponsors page for the sample league: sponsors by tier with tonight's exposure meter, the tier rules, sponsored moments and the vacancy card.

7.1 Tiers

Five fixed ranks, named per competition: the **Names** preset (Naming rights, Elite, Major, Partner, Supporter), the **Metals** preset (Naming rights, Platinum, Gold, Silver, Bronze) or your own. Each tier's **share of screen time** decides how turns are split when a sponsor has no target of its own. Each tier gets different places:

TIER	WHERE IT SHOWS
Naming rights	A tab on the scoreboard, under the title banner, first on the sponsor wall, and everything below.
Elite	The sponsored moments (super shot, streaks), ads in the breaks, the break card, and everything below.
Major	Ads and break cards, "presented by" footers on the stats cards, countdown and top shooters.
Partner	A slot in the score ticker and the logo spots.
Supporter	The sponsor wall and the end-of-night strip.

When this tier has no sponsor says what a spot does when its tier is empty: **Pull up** fills it from the tier below, **Pull down** from the tier above, **Skip tier** leaves it out, and **Advertise vacancy** shows the competition's vacancy card wherever a card fits. The vacancy card has a heading, a contact, a message and a link or email for its QR code, so an empty tier finds its own sponsor.

> **The vacancy card has a heading, a contact, a message and a link or email for its QR code, so an empty tier finds its own sponsor.**
>
> CHAPTER 7 · SPONSORS

7.2 A sponsor

A sponsor has a name, tagline, website, offer, brand colour, category, deal dates, and optional targets per stream (minutes on screen, ad plays). Category keeps competing sponsors apart in rotation. Add a colour logo and a white one for dark panels (without a white one, the colour logo is made white). A sponsor is kept once and can be **shown on** several competitions at its own tier in each; sponsors whose deal has ended stay greyed and the graphics skip them.

Ads are videos or stills (up to 10 per sponsor) in the media folder. A **Sponsor ads** step in a sequence plays the next ads due, taking turns fairly by tier, each video to its end with sound and each still for its seconds; tick **House ad** and the PIVT and FirstPass Studio ad plays when nothing is due. The **QR code** points to the sponsor's website with tracking tags, so visits from the stream show in their analytics; save it as a PNG for the sponsor's own use.

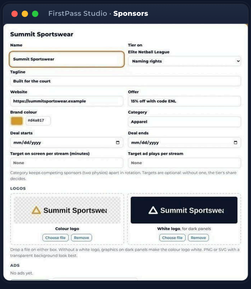

FIG 7.2 The sponsor editor: details, logos, ads, the QR code with tracking tags, and the competitions it is shown on.

7.3 Spots and moments

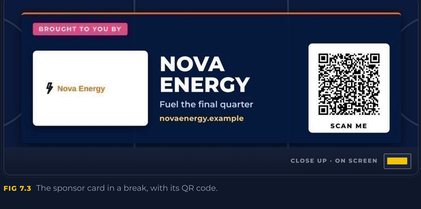

FIG 7.3 The sponsor card in a break, with its QR code.

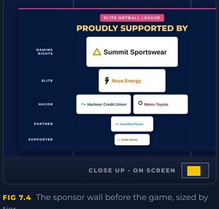

FIG 7.4 The sponsor wall before the game, sized by tier.

Every spot picks its sponsor from the Sponsors page by default. Each graphic's **Sponsor** option can pin one sponsor or turn the spot off. **Sponsored moments** sells the super shot, each hot streak and each game moment to one sponsor for the season, whose name appears in a "brought to you by" tag on the animation; by default the Elite sponsors take turns.

7.4 Proof of play

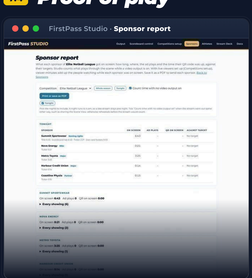

FIG 7.5 The sponsor report for the sample night.

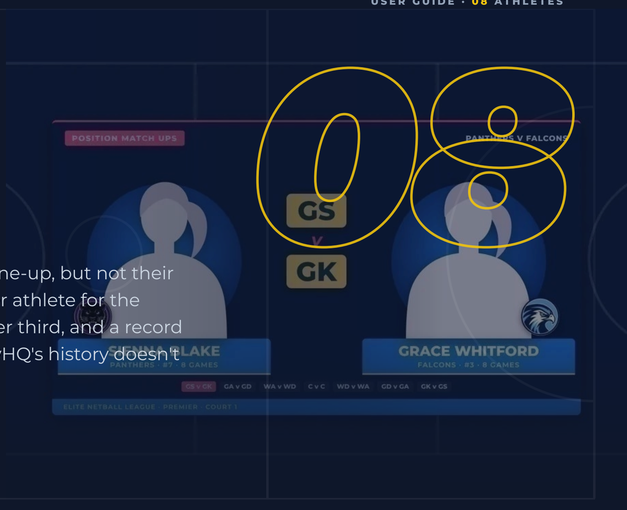

While a video output is on, Studio logs every second each sponsor is on screen and every ad played, matched to the scene's sources, and reads the live viewer count every 30 seconds. **Sponsor report** turns that into a page per night (or a run of nights) with minutes on screen, ad plays, viewer-minutes, peak and average viewers per sponsor, ready to print or save as a PDF for the sponsor. A tick box counts time with no video output on, for a rehearsal. With more than one output, only Output 1 and outputs with **Counts for sponsors** ticked are counted, and each counts as on air only while it's on: an output set to **Web links only** is off.

CHAPTER 8 OF 11

Athletes

PlayHQ gives Studio every athlete in a line-up, but not their faces. The Athletes tab holds a photo per athlete for the position match ups and the person lower third, and a record of positions and games played that PlayHQ's history doesn't cover.

1. Photos
2. Positions and games played

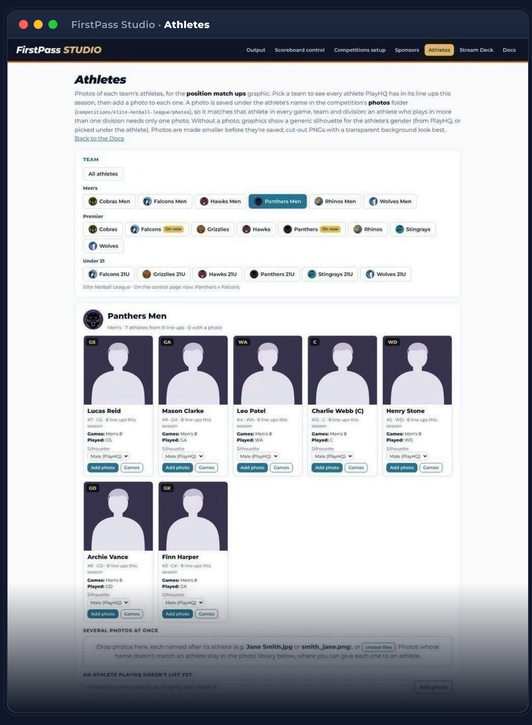

FIG 8.1

The Athletes page: teams grouped by division, every athlete PlayHQ has in a line-up this season, and the photo library.

8.1 Photos

Pick a team and add a photo to each athlete, or drop a folder of photos named after the athletes ("Jane Smith.jpg" or "smith_jane.png") on **Several photos at once**; any that don't match wait in the photo library to be given to someone. A photo is saved under the athlete's name for the competition, so an athlete in two divisions needs one photo. Photos are made smaller when saved; cut-out PNGs with a transparent background look best. Without a photo the graphics show a silhouette for the athlete's gender, taken from the division (men's, women's; mixed and open are neutral) and changeable under the athlete. **An athlete PlayHQ doesn't list yet** adds one ahead of their first game.

A photo only goes on the stream and the Socials pictures once **Approved for photo use** is ticked under the athlete. Tick it when the athlete, or their parent or guardian, has agreed to their image being used. Until then the graphics show the silhouette. **Approve all for photo use** ticks every athlete listed for the team at once.

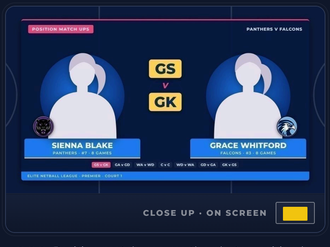

FIG 8.2 Position match ups use the photos, pairing by pairing.

FIG 8.3 The athlete lower third, named from the register as you type on the Output page.

> ***A photo is saved under the athlete's name for the competition, so an athlete in two divisions needs one photo.***

8.2 Positions and games played

Games under an athlete opens their record. Positions played in a PlayHQ line-up this season are ticked already; tick any others from other seasons or competitions. Games played takes a line per division (and club): the number as of a date, to which Studio adds the games PlayHQ shows after

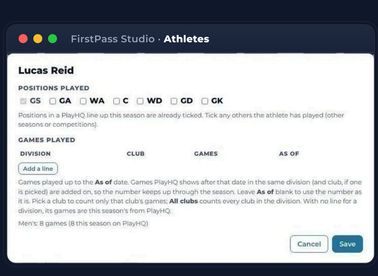

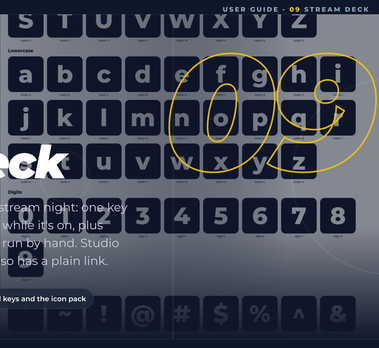

FIG 8.4 An athlete's positions and games played.

CHAPTER 9 OF 11

Stream Deck

A Stream Deck is the control surface for stream night: one key per source, scene and sequence, each lit while it's on, plus score, clock and quarter keys for a game run by hand. Studio ships its own plugin, and every control also has a plain link.

1. The plugin
2. Links for everything else
3. Timed keys and the icon pack

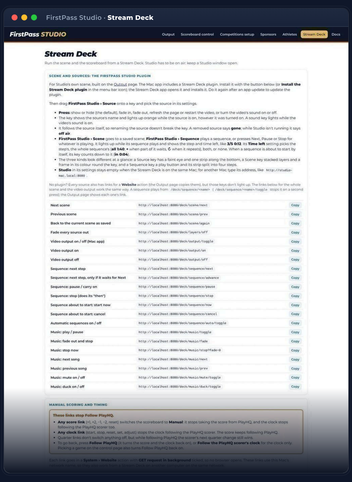

FIG 9.1

The Stream Deck tab: the plugin, the scoring and clock links, and the full reference below them.

9.1 The plugin

Install it from the 1P menu (**Install the Stream Deck plugin**) or the button on the Output page; the Stream Deck app opens and installs it. Do the same after an app update. The **Studio** field in a key's settings stays empty when the Stream Deck is on the same Mac; for another Mac, type its address, like `http://studio-mac.local:8080`. Four kinds of key, each a different shape at a glance:

KEY	LOOKS	PRESS	SHOWS
Source	A faint eye and one strip along the bottom	Show or hide (default), fade in, fade out, refresh the page or restart the video, video sound on or off	The source's name; lit in its output's colour while it's on, however it was turned on
Scene	Stacked layers and a frame in its colour	Go to a scene, next or previous scene, or back to the current scene as saved	Lit while its scene is on, with a yellow dot when sources have changed since
Sequence	A play button and a strip in four steps	Play or stop a sequence, play from the first step, or Next, Next when waiting, Pause and Stop for whatever is playing	Step and time left, like **3/5 0:12**, the whole sequence's time, both or none; **in 0:04** when one is about to start by itself
Switcher	A camera and a strip in two halves	A camera to preview (default) or program, stinger to a camera, Cut, Auto, an upstream or downstream key, Fade to black, run a macro	The camera's name from the switcher; red on program and green on preview, a key or Fade to black red while on air; a yellow dot while the switcher isn't answering

Keys follow their source, scene or sequence by id, so renaming on the Output page doesn't break them; a removed one says **gone**, and while Studio is off air they say **off air**. Colour groups keys by the part of the stream: green pre-game, blue live, purple quarter time, grey post-game, yellow ads, or the scene's or sequence's own colour.

With more than one output, each key has an **Output** setting: the output it shows a source on, plays a scene on or plays a sequence on (a Switcher key has none: there is one switcher). A lit key takes its output's colour (Output 1 orange, 2 pink, 3 blue, 4 green) with a black title, so a commentators' Stream Deck of Commentary keys lights pink while the stream's keys light orange. A key for a removed output says **no output**.

> ***Keys follow their source, scene or sequence by id, so renaming on the Output page doesn't break them.***
>
> CHAPTER 9 · STREAM DECK

9.2 Links for everything else

Every control is also a link, for a **System > Website** action (tick **GET request in background**), a Multi Action, or any program on the network. Scoreboard control, the Output page and the Stream Deck tab copy them, with this Mac's Stream Deck key after the port (`…:8080/k/key/deck/…`) so no web page can press them. The Studio plugin needs no key: the first time you press one of its keys the Mac asks you to **Allow** it, and from then on it signs every press with its own key pair. A link without it is refused, so copy any older Website keys' links again from Studio. With more than one Stream Deck, give each its own link set: pick **New link set…** in **Copy links for** on the Stream Deck tab, name it after the Stream Deck, and copy its links from there. If a link gets out, choose **Devices…** in the menu bar icon and press **Make a new key** on that set: its links stop working and you copy them again, while the other Stream Decks carry on. A program on another computer can ask for a key of its own: the Mac asks you to **Allow** or **Deny** it by name and address, and Devices… can take that one away without touching your other keys. The useful ones:

GROUP	LINKS
Scores	Home and away +1, +2, −1, −2; reset to 0; play a super shot or any streak without changing the score.
Scoring mode	Follow PlayHQ, Manual, toggle. Any score key switches to Manual.
Clock	Start, stop, toggle, reset, set to a time, add or take off any amount, follow the PlayHQ clock on or off, quarter length.
Quarter	Q1 to Q4, extra time, next, previous. The clock is separate; pair them in a Multi Action.
Game	Automatic selection on, off, toggle; the court to follow.
Ticker	Faster, slower, normal, a set speed.
Sources	Show, hide, toggle, restart, video sound; every source out; video output on or off.
Scenes	Go to a scene, next, previous, back to the scene as saved.
Sequences	Play, toggle, next, advance (only when waiting), pause, stop, start the one about to start now, cancel it, automatic sequences on or off.
Music	Play, pause, resume, stop, fade out, next, previous, load a song or playlist, mute, duck; add `?fade=2` for a 2-second fade.
Sponsors	Play the next sponsor ad due.
Switcher	Cut, auto, stinger (to a camera or what's on preview), fade to black, a camera to preview or program, an upstream or downstream key on, off or toggled, run a macro.

A LAYOUT THAT WORKS

Put the scene keys in a row across the top (Pre-game, Live game, Clear), the sequence keys under them with Next when waiting and Stop at the end, and a page of Source keys for the lower thirds and stats. A game run by hand gets a second page: home scores left, away scores right, the clock and quarter keys down the middle.

9.3 Timed keys and the icon pack

A second plugin, **Timed Sequence**, arms a key for a time of day and then presses a list of links with delays between them: reset the board at 18:55 and start the clock at 19:00, say. It is built from the repository. The **FirstPass Studio Characters** icon pack gives Stream Deck keys letters, numbers and symbols in the Studio style, for labelling keys by hand.

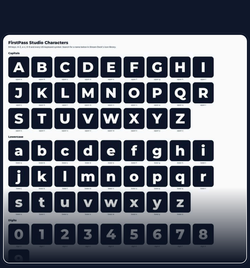

FIG 9.2 The Characters icon pack: A to Z, a to z, 0 to 9 and the usual symbols on navy.

CHAPTER 10 OF 11

Settings and care

Where Studio keeps its settings, how to carry them between Macs and back them up, how updates arrive, and what to do when something isn't right.

1 The 1P menu
2 The data folder
3 Settings in iCloud Drive
4 Backup and restore
5 Updates
6 Links and other devices
7 When something isn't right
8 Data and bandwidth

10.1 The 1P menu

The menu bar icon is Studio's home. From top to bottom: the version and whether Studio is on air; **Stop Studio** (while on air); **Open Studio**, Scoreboard control, Competition setup and **Copy the Studio link**; **Devices…**, **Install the Stream Deck plugin**; **Open the settings folder**, **Settings folder** (iCloud), **Back up…** and **Restore…**; **Open the debug log**, **Open the app log**, **Restart Studio**, **Check for updates**; **Open at login**, **Only this Mac can change things**, **What's new…** and Quit.

10.2 The data folder

Everything Studio saves lives in one folder outside the app, `~/Library/Application Support/FirstPass Studio`, so updates never touch it. In it: **competitions/** (a folder per competition with its settings, logos, font, athlete photos and register), **sponsors/**, the scene, sequences, music and playlists, the **media** folder, **control.json** (Scoreboard control's choices), **scoreboard-state.json** (the game, scores and clock, saved every few seconds so a restart mid-game loses nothing), **config.json** for this Mac's own settings, **logs/** and **backups/**.

10.3 Settings in iCloud Drive

Settings folder > Move to iCloud Drive… moves the settings into a folder you choose in iCloud Drive, in a subfolder named after this Mac, so each Mac on the same Apple account keeps its own and none saves over another's. The debug log, scores and clock, caches and window positions always stay on the Mac. **Restore from another Mac…** copies another Mac's settings over this one's (competitions, scenes, sequences, music, control choices), backing this Mac's up first. **Move back to this Mac…** undoes the move. Studio goes off air for a moment for each and comes straight back.

10.4 Backup and restore

Back up… saves every setting in one zip named with the date and time, with notes you type and, if you choose, the media folder; beside it goes a text summary listing the competitions, sequences, playlists, sources, scenes and sponsors inside. **Restore…** shows when and where a backup was made and what it holds, backs up this Mac's settings first, and replaces them only once the whole zip has unpacked and checked out. This Mac keeps its own **Only this Mac can change things** choice, port and link name whatever the backup says. Make a backup after setting up a season and before trying anything new on the Output page.

10.5 Updates

Updates download by themselves and install when the app quits, never mid-stream; **Check for updates** looks now, and **Restart to update** appears when one is ready. If a newer version has come out since that one downloaded, it asks whether to get the newer one first or install the one it named. The first launch after an update shows **What's new**, the changes since the version you last opened. When an update changes how settings are saved, Studio backs the data folder up to **backups/** first; settings saved by a newer Studio open read-only in an older one.

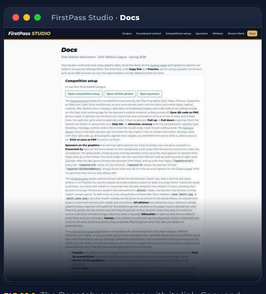

FIG 10.1 The Docs tab; every page with its link, Copy and Preview, the page options, and the notes this guide draws on.

> **Updates download by themselves and install when the app quits, never mid-stream.**
>
> CHAPTER 10 · SETTINGS AND CARE

10.6 Links and other devices

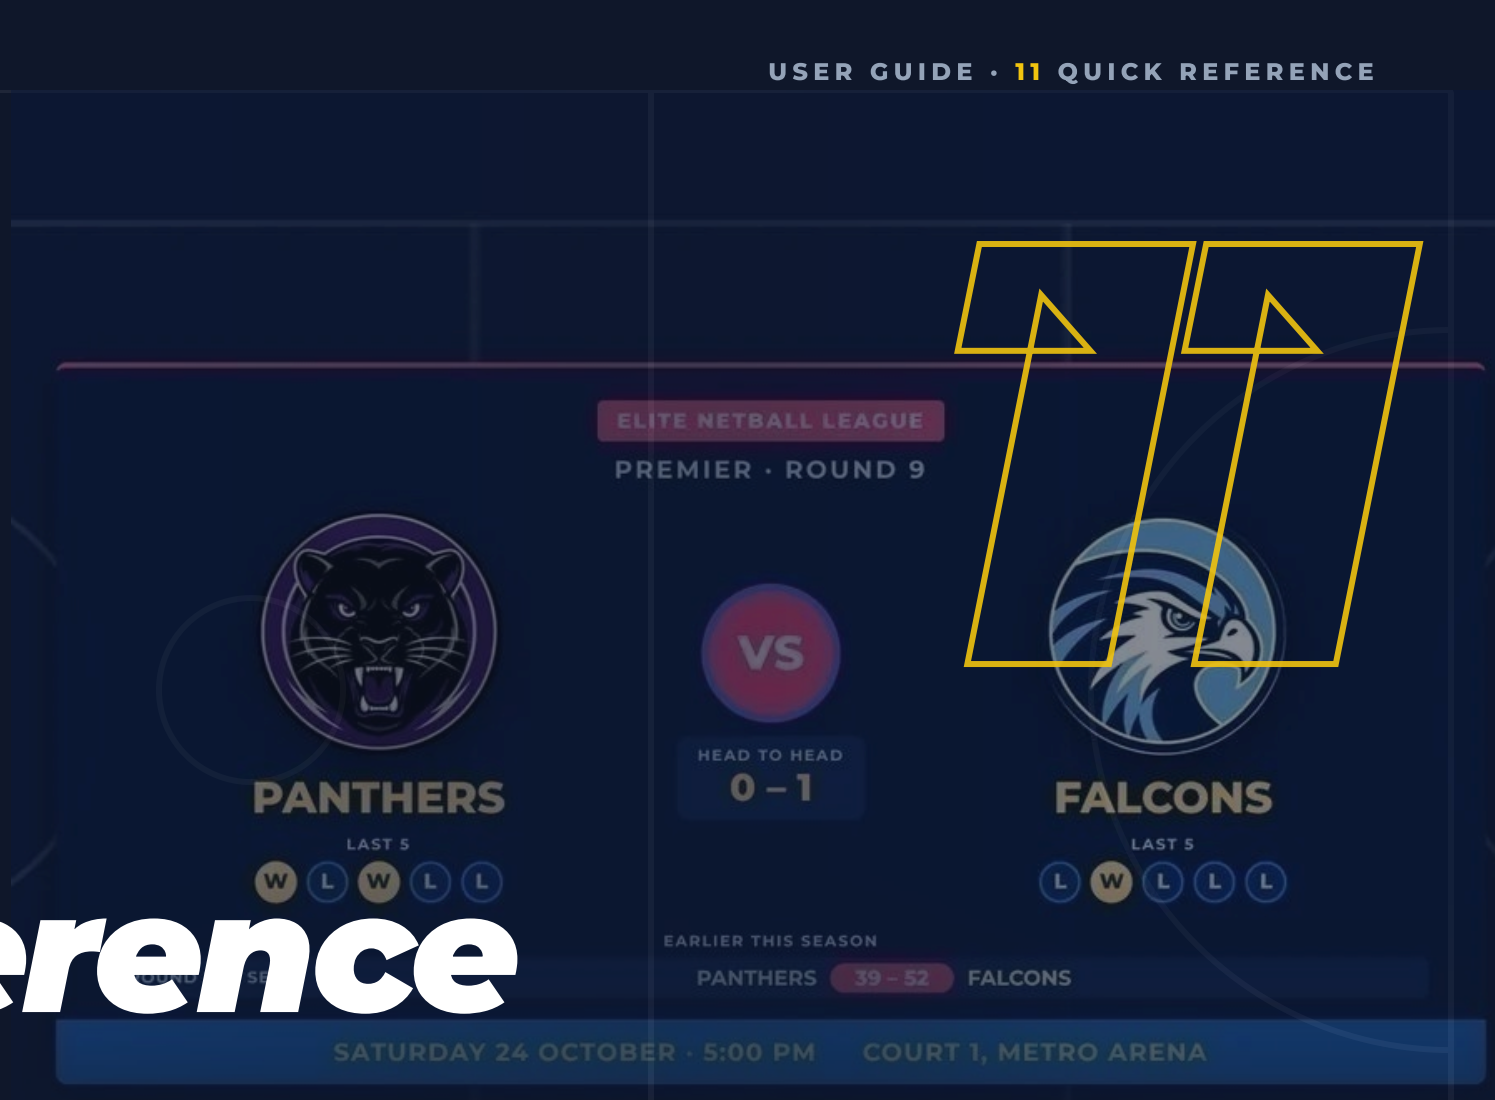

Studio's links use this Mac's Bonjour name (the Local hostname in System Settings > General > Sharing), so the same link works from a phone, another computer or a Stream Deck on the network; `localhost` still works on the Mac. Anything on the network can open the graphics. Only this Mac can change scores, the scene, sequences and settings: **Only this Mac can change things** is ticked every time Studio opens. To score from a phone or let another computer drive, pair it instead: open `/pair.html` on it (the Studio link with `/pair.html` on the end), type a name and press **Ask the Mac**, then choose **Allow scoring only** or **Allow everything** on the Mac. A paired device works with the box ticked, and **Devices…** in the menu bar icon lists it, changes what it may do, or removes it. Unticking the box lets every device on the network in until Studio quits; keep that for emergencies. On a network you don't control, leave it ticked, or block incoming connections to FirstPass Studio in the Mac's firewall.

10.7 When something isn't right

WHAT YOU SEE	WHAT TO DO
The board doesn't move before the game	Normal: nothing is read before the electronic scoring window opens. Scoreboard control says when it will start checking.
The board stops mid-game	PlayHQ isn't answering. Switch to Manual and run it by hand; Follow PlayHQ picks it up again when PlayHQ is back.
The wrong night or game is on	Pick the game night on Scoreboard control and pick the game; tick automatic selection again afterwards.
A key says off air	No Studio window is open. Open Studio from the 1P menu.
A graphic looks stale	Press its Restart key or turn it off and on; with **Load the page fresh** on it reloads each time.
Studio itself stops	**Restart Studio** in the 1P menu brings it back with the scores and clock it had.
Anything else	**Open the debug log** in the 1P menu. Everything Studio does and every PlayHQ answer is in it, 15 MB at most. Send it with a note of the time.

10.8 Data and bandwidth

The graphics only ever talk to Studio on the Mac. Studio alone contacts PlayHQ: one small request every 5 seconds for the followed game (or as set, down to one a second), the ticker's other courts every 30 seconds, the fixture about once a minute for automatic selection, and the rest once when a graphic loads. The Production Planner and the Socials tab read the same fixture, results and ladders through the same cache, and finished games' line ups once, so they add nothing; the Fixture board reads other courts' live scores the ticker's way, so it adds nothing while the ticker is on and at most one request a minute per live game when it isn't. Commentator stats' auto-refresh asks Studio only; its team lists are read at the start and at each quarter break. Finished games are read once and kept. Extra outputs read the same data from Studio, so they add nothing here. It all comes to well under a megabyte an hour, so a phone hotspot is enough for Studio; the stream itself is the bandwidth.

CHAPTER 11 OF 11

Quick reference

1 Keyboard
2 Stream night in nine lines
3 Where things are set

11.1 Keyboard

WHERE	KEYS
Scoreboard control	A / Z home +1 / −1, K / M away +1 / −1, Shift for +2 / −2, Space starts or stops the clock.
Any Studio window	⌘1 to ⌘9 go to Output, Production Planner, Scoreboard control, Competitions setup, Sponsors, Athletes, Stream Deck, Socials, Docs. ⌘N new window, ⇧⌘O open in the browser, ⇧⌘C copy the page link, ⌘[back, ⌥⌘W close every Studio window.

11.2 Stream night in nine lines

01
Open Studio from the 1P menu and keep the Output page open all night.

02
Check the competition in use and the court on Competitions setup.

03
On Scoreboard control, the first game on your court is picked with Follow PlayHQ on.

04
Turn on the video output your switcher takes and show one graphic to see it land.

05
Play a few seconds of music and an animation with sound.

06
Press a Source key and watch the Output page follow it; put scoring back to Follow PlayHQ after testing.

07
Go to the Live game scene and let the sequences run the breaks.

08
Pick finals winners as they happen; turn on lower thirds when people appear.

09
Press Stream close, turn the output off, and send the sponsor report.

11.3 Where things are set

TO CHANGE	GO TO
Colours, font, logos, rules, finals format, court	Competitions setup
Which game, scoring mode, score, clock, finals winners	Scoreboard control
What's on screen, scenes, sequences, playlists, music, mics, outputs	Output
A graphic's options (heading, position, division, animate away)	Output, under the source's address
Sponsors, tiers, ads, moments, the report	Sponsors
Photos, positions, games played	Athletes
Each night's court, the commentators and who calls each game	Production Planner
Keys and links	Stream Deck
Pictures of a game night for social media	Socials
Backups, iCloud, updates, the debug log	The 1P menu

FirstPass Studio is made by PIVT. The Elite Netball League, its clubs, athletes and sponsors are fictional.

FirstPass STUDIO

MADE BY PIVT

FirstPass Studio is made by PIVT. The Elite Netball League, its clubs, athletes and sponsors are fictional.
