Your competition, everywhere.

FirstPass Studio turns your PlayHQ competition into a live broadcast. It puts graphics on the stream and the big screen, gives your commentators a plan, gets your sponsors seen, and posts the results to your socials.

Socials

Results, match-ups, ladders and top shooters become Instagram posts, made from the night's games.

Sponsors

Sponsors appear on the stream, on the big screen and on every post. A report shows how often each one was on air.

Commentary

You plan who's on the mic for every game. Their names and live game stats fill in by themselves.

Run it with two

Sequences follow the game clock, and Stream Deck keys handle the quick calls by hand.
